QJC

Company profile

Quantum Jump Club (QJC)

We build AI that runs your company's repetitive work.

sangrok@quantumjumpclub.com · qjc.app

What we do

Three things we do

01

Diagnosis and design

We pick which work goes to AI first, then design the scope and the standards.

02

Automation and AI agent build

We build agents that run the chosen work, and your team verifies them.

03

Staff training and operations

Your people learn to use them, and we keep improving until operations hold.

How we work

Four steps

01

Consultation and task selection

02

Scope and work standards design

03

Build and verification by your team

04

Handover to operations and improvement

Three promises

- You can start without a written plan.
- We do not push a contract. We look at fit and priority first.
- Your strategy, data and operating assets are never reused in another project.

Numbers and clients

QJC in numbers

35,000+

subscribers on the "Quantum Jump Club" YouTube channel
